We have been very busy in ELT1 reviewing our sounds that we learnt in Kindy. So far we have looked at the following sounds; s,a,t,p,i,n,d,m. We have also revisited the 10 sight words we learnt in Kindergarten and have started practising these at home. Parents remember to encourage your child to practise these every night and even in the morning. Teachers will test your child 3 times across a day or two and then will change the list once your child is fluent with them.

EL1 has been busy meeting and making new friends and talking about ourselves. We have also started to learn about our families, and will be doing lots more to do with families throughout the second half of the term as we go into Harmony Week.

In Maths we have been reviewing numbers to 10 forwards, backwards and all the way around. We have been playing some games with partners to learn to work together and review what we already know about these numbers. We have now started to look more closely at teen numbers and are learning to work with these in our heads.
In Science we have done our first few experiments using ice and watching it melt in a range of environments and exploring colour through using droppers to mix them and make patterns. We have also been learning about the needs of living things.

We had our first big assembly this week and have started lots of new and exciting things such as going to the Library and our daily obstacle course.

Parents please watch the notice board outside our room for the parent roster going up soon and any updates. We are always looking for help with scrapbook gluing so please let staff know if you have help even if it’s just for 10 minutes.
