Dear Year 4 & Year 5 parents/carers

Bring Your Own Device (BYOD) Program

Campbell Primary School offers each student in Year 5 and Year 6 the opportunity to participate in our BYOD program. This program enables students to use their own iPad to achieve enhanced access to engaging learning through the school's wireless network. This is particularly valuable as the school invests in more online learning programs, catering to individual student needs within the context of the Western Australian curriculum.

The devices need to conform with the following specifications:

- iPad or iPad mini
- Minimum 32 GB
- A8 or A9 chip
- iOS 11 compatible

Please note that iPads are not covered by the school's insurance. While a protective case is not a requirement, it is highly recommended. It should be as sturdy as possible with all corners enclosed as a minimum.

Year 6 students can continue to use the same iPad they used in Year 5: however, if the iPad is older than an iPad 5th generation, the operating system might not be able to be updated for the full year. This can result in increased software security issues and the iPad might slow down considerably.

On **Thursday, October 11, 2018 from 6pm to 7pm** we will be conducting an Information for Parents session about the BYOD program in our Information Centre. In this session we will be covering helpful tips on how to:

- Care and maintain the iPad
- How to set restrictions on the iPad
- What is an apple ID
- Connect
- Educational websites

We hope you can join us at the BYOD information session on **Thursday, October 11, 2018**.

Yours sincerely

Howard Christie
Assistant Principal
