I am father of Luke and Sophie on Year 6 and 4 respectively. My wife is a primary school teacher in South Perth and I work as a manager with a local Electrical Contractor. Our family lives a short distance from Campbell Primary and try to get involved where possible. I have 10 + years' experience in project management and general management positions with formal qualifications. I have a good general knowledge and decision making skills. I operate with integrity and believe I would be an important part of a team to provide the best outcomes possible for the school, stakeholders and the wider community. I am interested in how the board operates and would welcome the experience on a personal level working with my kids school and from a development perspective.

### **Vaughan James**

I am the father of two boys who have attended Campbell Primary School with my youngest currently in Year 5. Both boys have enjoyed their time at Campbell and also grown under the different education areas of the school. My wife has also been involved with the school having organised the Scholastic Book Club since 2013 till present.

I am a Structural Engineer with over 20 years' experience in running projects small and large and currently I run my own consulting engineering business. For the past 11 years (5 as President) I was involved at the executive level on a not-for-profit agricultural society running a large community event while engaging with a large selection of the community including local primary and secondary schools. I was also the coach of my sons sporting team for 5 years which gave me an insight into training young minds.

With these technical and business experience and my community roles I believe I would bring a rounded global view to the School Board. I would build on the expertise of the current members without having an agenda as my son will be in year 6 next year. My belief is that we need to be ensuring that the School Board does not take the safe options and that the Board continues to challenge what is best for the students. We need to ensure that they can excel and we provide a well-rounded education for all students to prepare them for their continuing education at High School.
